***Allowable Subject Matter***

***Drawings***

1. The corrected or substitute drawings were received on 4/29/02. These drawings are approved.

***Reasons for Allowance***

2. The prior art teaches semiconductor components attached to a substrate with compliant or resilient contact structures, but fails to teach, disclose, or suggest, either alone or in combination, at least on claim 1, a microelectronic assembly comprising: a connection component including a support structure, one or more leads attached to said support structure and projecting from said support structure, each said lead having an elongated section spaced from said support structure so that said elongated section is movable with respect to support structure and a jacket of a dielectric material surrounding each said lead over at least a part of the elongated section of that lead; and a semiconductor chip having contacts thereon, at least some of said contacts on said chip being connected to at least some of said elongated sections of said leads. Therefore, dependent claims 2-12 are also allowed.

**Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references teach some of the elements of the instant claimed invention, such as compliant or resilient contact structures: Southgate (US Patent 3,842,189), Yanof et al. (US Patent 5,476,818), Matsumoto et al. (US Patent 4,893,172) and Kobayashi et al. (US Patent 4,732,313).
